3. Contactless card operation

Put the contactless card into the terminal area, you can finish swiping card immediately.

4. Printer

The printer prints the purchase order once the transaction is completed.

5. Charging the Terminal Battery

Use the USB cable provided with the machine to connect the terminal to a charger. This will allow you to charge the terminal's battery. If you plan to store the terminal for an extended period, it's recommended to shut down the terminal and charge it once every three months to maintain battery health.

Guidelines for using lithium battery

5

1. Avoid damaging the USB cable. If the cable becomes damaged, it could prevent the device from being used.
2. Always use the USB cable provided in the box to charge the terminal. Using other cables or chargers may expose the terminal to incorrect voltages and could potentially damage the equipment.
3. Do not expose the terminal to direct sunlight, high temperatures, humidity, or dust.
4. Keep the device away from any liquid.
5. Avoid inserting any foreign objects into the terminal interfaces as this can seriously damage the device.
6. If the terminal isn't functioning properly, please contact our technician. Users are not allowed to attempt repairs on the terminal themselves.
7. It is strictly forbidden to disassemble the terminal or use its external interface in explosive or hazardous environments.
8. To clean the terminal, gently wipe it with a damp cloth.

The product shall only be connected to a USB interface of version USB2.0 and that the connection to a power USB is allowed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED
BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING
TO THE INSTRUCTIONS

Adapter shall be installed near the equipment and shall be easily accessible.

Only can use adapter as below:

Adapter Model: GQ10-050200-ZGU

Input:AC110-240 50/60Hz 0.35A Output:DC5V2.0A

Dong Guan City GangQi Electronic Co.,Ltd.

The plug considered as disconnect device of adapter.

This product is intended for sale and application in a business environment.

FCC Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. The SAR limit of USA (FCC) is 1.6 W/kg averaged. Device types: Smart POS (FCC ID: 2A8NR-Z92) has also been tested against this SAR limit. SAR information can be viewed on - line at <http://www.fcc.gov/oet/ea/fccid/>. Please use the device FCC ID number for search. This device was tested simulation typical 5mm to body. To maintain compliance with FCC RF exposure requirements, use accessories should maintain a separation distance between the user's bodies mentioned above, the use of holsters and similar accessories should not contain metallic components in its assembly, the use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
