

4. How to use and connect apps

● It's simple to use a gas smarter.

1. You can turn it on by flipping the power switch up.
2. When the power is turned on, a sound effect and a voice guidance message indicating the remaining battery level are heard.
3. If you are using the alarm alone, you can install it in the desired location in this state.
4. During operation, the LED indicator lights up once every 10 seconds.
5. You can turn it off by flipping the power switch down.
 - ※ You can turn off the power by pressing the power switch for a long time even during the alarm.

● Try connecting it to your smartphone.

1. Recognize the QR code on the right with your smartphone and go to the app installation page.
2. Try installing the Gas smarter app.
3. When the app is installed, click the Find (Connect) button in the center of the screen to connect to the gas smarter.
4. When connected, the 'Connected' voice guidance and body motion indicator flashes twice.
5. You can now see the status of carbon monoxide gas on your body and smartphone.
6. When the connection is disconnected, a voice message will appear saying 'Disconnected'.

● The gas smarter is...

1. Regardless of the presence or absence of a Bluetooth connection, carbon monoxide is continuously monitored in operation.
2. If you don't want to use it, you can turn it off.
3. When the battery is fully charged, it can be used for a week continuously with a Bluetooth connection, and if used without a Bluetooth connection, it can be used for about 20 days, but depending on the environment and situation, the battery may run out faster.

5. Tips on how to behave in case of an alarm

- If you are indoors, ventilate as soon as possible and move to a place with fresh air.
- When checking the alarm from the outside, open the door, window, etc. and check the inside for people inside
- If you are unconscious due to carbon monoxide poisoning, quickly move it to the outside with fresh air, call 119, and take it to the hospital.
- In the case of mild headaches, it is relieved by moving to a place with fresh air and taking a rest.
- If the addiction is severe, seek professional treatment at the hospital
- In the case of carbon monoxide poisoning, quick response determines life and death, so act

6. Safety precautions

※ These precautions are crucial for your safety, so be sure to follow them.

- This product is a portable device.
- Do not allow the gas smarter body and components to get wet. It will cause failure.
- Do not apply, drop, or throw a strong impact.
- Do not open or disassemble the main body.
- Do not block the hole in the front. Gas and air must flow well into the body.
- Do not spray the body directly with air fresheners, pesticides, etc. Chemical substances shorten the life of the product and cause malfunction
- The ambient temperature during charging is 0 to 40°C.
- Do not use it if any part of the battery is overheating, bulging, deformed, leaking, etc.

※ Symptoms of carbon monoxide concentration

1.28% (12800ppm)	Death within 1 to 3 mins
0.64% (6400ppm)	Headache within 2 mins, nausea/death within 10-15 mins
0.32% (3200ppm)	Headache within 5 to 10 mins, nausea/death within 30 mins
0.16% (1600ppm)	Headache nausea within 20 mins/death within 2 hours
0.08% (800ppm)	Headache nausea within 45 mins/fainting within 2 hours
0.04% (400ppm)	Headache within 1-2 hours
0.02% (200ppm)	Headache within 2-3 hours

For the safety of campers and everyday life

Gas smarter^{pro} INT-2600CO

Hello, customer.

Thank you for purchasing "Gas Smarter pro"

Gas smarter pro is a smart gas alarm that protects you from carbon monoxide gas. Carbon monoxide poisoning accidents are occurring more than we know, and they are dangerous gases that can kill even if only 1% of the air is present.

But alarms are necessary because we can't see them with our five senses, and we need to communicate the danger to the outside world.

The top priority for gas smarter is to save people's lives from carbon monoxide poisoning accidents in camping and daily.

If even one person could save a life with our product, it would not be more rewarding.

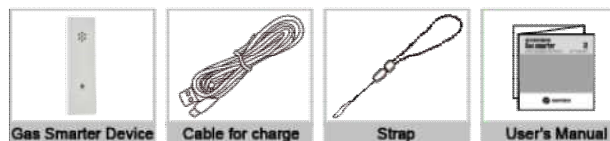

We will come back with more advanced products. Thank you for your support.

From all of us at INNOTECO

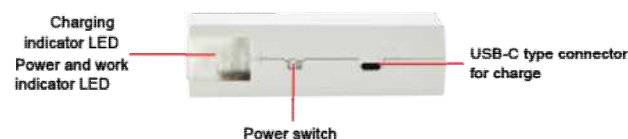

1. Components

- Gas Smarter Device : 1piece
- Cable for charge : 1piece
- Strap : 1piece
- User's Manual : 1copy

2. Name of Device part

3. Specifications

Method	Electrochemical formula	Power Consumption	4.5 mW
Target Gas	Carbon monoxide (CO)	Temp & Humidity	-20°C ~ +40°C / ~85%RH
Indication	LED(Yellow) Blink, Buzzer, Voice	Weight	80g
Rated voltage	Charging 5V, 2A, Battery 3.7V 700mA	Size	86(W)×86(H)×37(D)mm

Warranty

Product Name	Gas smarter pro	Model	INT-2600CO
Manufacturing	20 year month	Warranty period	1 year from the date of purchase
Date of purchase	20 year month	Customer name	

This product has passed the strict quality control and inspection of Innoteco Inc. During the warranty period, any failure that occurs during normal use will be repaired free of charge.

How to get a service

If there is an abnormality while using the product, please check the instruction manual and contact the customer satisfaction office of the headquarters.

Free Service Information

The warranty period for the product is one year from the date of purchase, and if a problem occurs under normal use, it will be repaired free of charge. In the following cases, an actual service fee will be charged.

- If the free warranty period has expired
- For failures caused by intentional or mishandling by the consumer
- In the case of failure due to natural disasters (fire, flood, earthquake, etc.)
- Repairs or modifications other than our service personnel

Durable guidance

The durability of this product in normal use is 5 years.
(The durability in poor environments is shorter than in normal use.)

We are not responsible for products that have expired.
