 H 0 6 Neckband Earphones Use Instructions	About Earphones  Product Specifications <table><tr><td>Version: V 5 . 4</td><td>Battery capacity: 280mAh</td></tr><tr><td>Usage time: 30 hours</td><td>Charging time: ~ 2 hours</td></tr><tr><td>Distance: 10-20 meters associated stereo</td><td>Charging power 5V=150mA</td></tr><tr><td>Driver: 14.2mm</td><td>Working voltage: 3.4-4.2V</td></tr><tr><td>Impedance: 32Ω</td><td>Frequency: 24-2480GHZ</td></tr><tr><td>Working environment: -10~60℃</td><td>Working current: 5~15mA</td></tr><tr><td>Standby time: about 300 hours</td><td></td></tr></table> Indicator Light Description <table><tr><td>Power on: Flashing blue three times</td></tr><tr><td>Pairing: Flashing red and blue alternately</td></tr><tr><td>Work: Indicator off</td></tr><tr><td>Charging: Steady red</td></tr><tr><td>Shutdown: Flashing red three times</td></tr><tr><td>Fully charged: Light turned off</td></tr></table>	Version: V 5 . 4	Battery capacity: 280mAh	Usage time: 30 hours	Charging time: ~ 2 hours	Distance: 10-20 meters associated stereo	Charging power 5V=150mA	Driver: 14.2mm	Working voltage: 3.4-4.2V	Impedance: 32Ω	Frequency: 24-2480GHZ	Working environment: -10~60℃	Working current: 5~15mA	Standby time: about 300 hours		Power on: Flashing blue three times	Pairing: Flashing red and blue alternately	Work: Indicator off	Charging: Steady red	Shutdown: Flashing red three times	Fully charged: Light turned off	Paring When the earphones are in pairing mode, the indicator light will flash blue and red alternately. 2 Turn on the Bluetooth function on your device and find to connect to the Bluetooth settings screen and pairing. When connected, the indicator light will turn off. 3 If these earphones are not connected to a device for 3 minutes, they will automatically shut down. Pairing to Another Device When it connects to a device, turn off the Bluetooth function of the device. You can connect H06 to another device according to the above operation process. When connected, you can turn on the Bluetooth function of the first device again. Key Operation Power on - Long press and hold the power button for 2 seconds Shutdown - Press and hold the power button for 4 seconds Answer call - Click the power button when there is an incoming call Hang up - Click the power button during the call Play/Pause - Click the power button while listening to the song Last/Next - Double-click the power button during playback Reject call - Long press the power button when there is an incoming call Game mode - Triple click the power button after pairing Call for voice assistant - Long press and hold the power button for 2 seconds Previous song - Long press the "+" key Next song - Long press the "-" key Reduce volume - Click the "-" key	Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Statement: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.
Version: V 5 . 4	Battery capacity: 280mAh																						
Usage time: 30 hours	Charging time: ~ 2 hours																						
Distance: 10-20 meters associated stereo	Charging power 5V=150mA																						
Driver: 14.2mm	Working voltage: 3.4-4.2V																						
Impedance: 32Ω	Frequency: 24-2480GHZ																						
Working environment: -10~60℃	Working current: 5~15mA																						
Standby time: about 300 hours																							
Power on: Flashing blue three times																							
Pairing: Flashing red and blue alternately																							
Work: Indicator off																							
Charging: Steady red																							
Shutdown: Flashing red three times																							
Fully charged: Light turned off
