Complete the pairing connection of the first mobile phone according to the above pairing method, and then close the first phone Bluetooth on your phone. 2. Pair the second mobile phone in the same way, and then use the first mobile phone Bluetooth enabled again click A23 device connect. 3. In the power on state, if the headset is not connected for 3 minutes, it will automatically shut down. connect two mobile phones at the same time 1.Complete the pairing connection of the first cell phone according to the above pairing method, and then close the first cell phone wireless features or mobile phones. 2. Match the second cell phone in the same way, and then match the first cell phone. Open the wireless function and click "A23" device connection again. Touch Control operation Game / music mode -- Double click EQ mode switch -- Triple click The keys operation Power on -- Press the power button for 2 seconds Power off -- Press the power button for 4 seconds Answer the phone -- Press the power button when an incoming call comes in Hang Up -- Click the power button while you are talking Play/Pause -- Click the power button while listening to the song Last number Redial -- Double click the power button while working Reject calls -- Hold down the power button when an incoming call comes in Call the voice assistant -- Hold down the power button for 2 seconds Previous -- Long press the + key Turn up the volume -- click the + key Next - Long press -- key Reduce the volume -- click the - key	Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. FCC Statement: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.
Version: V5.2	Battery capacity: 480mAh																
Working time: 50~80 hours	Charging time: ~1 hours																
Working distance:15~25m	Charging power: 5V-450mA																
Horn: Φ8mm	Working voltage: 3.1~4.2V																
Impedance ohmic value: 32Ω	Frequency: 2.4-2.480GHZ																
Working current: 5~15mA	Standby time: ~365day																
Working environment: -10~60℃
