FCC Statement This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: •Reorient or relocate the receiving antenna. •Increase the separation between the equipment and receiver. •Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. •Consult the dealer or an experienced radio/TV technician for help. Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment. This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. 7	Specific Absorption Rate (SAR) information: This Color Paper S-Book meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: Color Paper S-Book has also been tested against this SAR limit. This device was tested for typical body worn operations with the back of the phone kept 10mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 8mm separation distance between the user's body and the back of the phone. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided. 8

Double-sided black and white printing,
Fan fold.

•high volume for long periods of time. •Use the device when the temperature ranges from 0°C to 35°C, and store the device and its accessories when the temperature ranges from -20°C to +45°C. When the ambient temperature is too high or too low, device faults may occur. •Do not expose the device and its batteries to high temperatures or near heating devices, such as sunlight, heaters, microwaves, ovens, or water heaters. Overheating of the battery may cause an explosion. •When charging the device, the power outlet should be installed near the device and should be easily accessible. •When charging is complete or not, disconnect the power adapter from the device and remove the power adapter from the power socket. •Do not use the power adapter in wet areas (such as near the sink, bathtub, or shower). Do not plug and unplug the power adapter with wet hands. •This device uses non-removable built-in batteries. Do not replace the batteries yourself to avoid normal operation of the device or battery damage. For your personal safety and the normal operation of the product, you are strongly advised to go to the NVD customer service center to replace the battery of the device. Note: Replacing the battery with the wrong model may cause explosion. Always dispose of the used battery according to the instructions. •Please dispose of the equipment, batteries and other accessories according to local regulations. Do not dispose of them as household garbage. Improper battery disposal may cause battery explosion.	•Do not throw the battery into the fire. Do not disassemble, drop, squeeze or modify the battery. Do not insert or puncture the battery or immerse the battery in water or other liquids. •Do not throw the battery into the fire. Do not disassemble, drop, squeeze or modify the battery. Do not insert or puncture the battery or immerse the battery in water or other liquids. •Use of unauthorized or incompatible power supplies, power adapters, or batteries may cause fire, explosion, or other hazards. •Only accessories approved by the equipment manufacturer and compatible with this type of equipment can be used. If other types of accessories are used, it may violate the warranty terms of the equipment and the relevant regulations of the country where the equipment is located, and may lead to safety accidents. For approved accessories, please contact NVD Customer Service Center. •The radio waves generated by the device may affect the proper functioning of implantable medical devices or personal medical devices, such as pacemakers, cochlear implants, hearing AIDS, etc. If you use any of these medical devices, please consult the manufacturer about the restrictions on their use. •Keep at least 15 cm away from implanted medical devices (such as pacemakers, cochlear implants, etc.) when using this device. •If you upgrade the firmware and system of a device using unauthorized third-party software, the device may become unavailable or your personal information may be leaked. It is recommended that you upgrade the device online or send it to your local NVD customer	service center for upgrade. •To prevent data loss, you are advised to back up data during daily use and before the device is upgraded or sent for repair. •If a consumer uses a power adapter to supply power, purchase a power adapter that meets the safety standards or has obtained the CCC certification. To ensure the safe use of the device, it is recommended to test the heating condition of the device under charging state and use the 5V 2A adapter. •In order to better protect oversight and prevent equipment overheating, do not use the highest level of brightness adjustment for a long time. The name and content of harmful substances in the product <table> <tr> <th colspan="6">Hazardous substance</th> </tr> <tr> <th>Component</th><th>RoHS (Pb)</th><th>RoHS (Hg)</th><th>RoHS (Cd)</th><th>RoHS (Cr(VI))</th><th>RoHS (PBB)</th></tr> <tr> <td>Base</td><td>×</td><td>○</td><td>○</td><td>○</td><td>○</td></tr> <tr> <td>Battery</td><td>×</td><td>○</td><td>○</td><td>○</td><td>○</td></tr> <tr> <td>Accessories</td><td>×</td><td>○</td><td>○</td><td>○</td><td>○</td></tr> </table> This table is prepared in accordance with the provisions of SJ/T 11364. ○:It indicates that the content of the hazardous substance in all homogeneous materials of the part is below the limit requirements specified in GB/T 26572. ×:It indicates that the content of the hazardous substance in all homogeneous materials of the part	Hazardous substance						Component	RoHS (Pb)	RoHS (Hg)	RoHS (Cd)	RoHS (Cr(VI))	RoHS (PBB)	Base	×	○	○	○	○	Battery	×	○	○	○	○	Accessories	×	○	○	○	○	exceeds the limit requirements specified in GB/T 26572, and there is no mature alternative in the industry to meet the environmental requirements of the European Union RoHS directive. Depending on the model, the product may not include all the above components except the host. The actual product configuration prevails. ③ The number in this label indicates that the environmental protection cycle of the product under normal use is 20 years. Some parts may also have the environmental protection life label. The environmental protection life is subject to the number in the label. All rights reserved by NVD. This guide is for reference only and does not constitute any form of commitment. The product (including but not limited to color, size, screen display, etc.) shall be subject to the actual product.
