INTELLIGENT TRANSLATION MACHINE

PRODUCT MANUAL

Real-time translation Accurate and professional
Multilingual support convenient to carry
Clear pronunciation Easy to operate

Warm reminder: This manual is provided with the product at the time of shipment.
If there are any updates or upgrades to the software later, please to the latest software version!

BRIEF DESCRIPTION

The intelligent translation machine is a small electronic translation device that supports mutual translation of multiple languages and is easy to carry. The device is built-in with various functions such as online voice translation, offline voice translation, photo translation, smart recording, input translation, simultaneous interpretation and dictionary translation.The device is small and portable, suitable for various scenarios such as foreign language communication, cross-border business communication, overseas travel, and foreign language learning. One language connects you to the world, your personal dedicated translator.

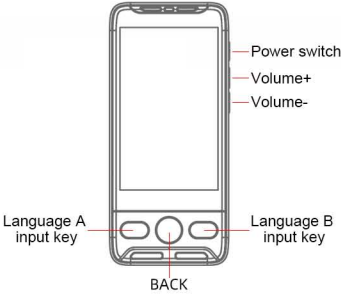

PACKING LIST

Brand name	Quantity
Device	1PCS
Data cable	1PCS
Instructions	1PCS
QC label	1PCS

PRODUCT INFORMATION

Product Name	Intelligent translation
Product model	Color box label information
Charging port	Type-C
Input voltage	5V=2A
Operating method	Touch Key Press
Networking method	2.4G WIFI & Mobile Hotspot
Usage environment	0-40 degrees Celsius
Language support	18-language offline voice translation 142-language online voice translation 142-language online text translation

KEY FUNCTION

- Online Translation**
- 1: Supports online voice translation in 142 languages.
 - 2: Please connect to the network before using this.

 - 2: Please connect to the before using this feature.
 - 3: Click to enter the mobile translation interface and scan the QR code to establish remote voice translation functionality.

- Group Translation**
- 1: Supports real-time voice translation across devices for 142 languages.
 - 2: Please connect to the network before this feature.
 - 3: Click to enter the group chat translation interface, click to create a group chat, enter the member IDs to start the group chat translation function.

- World Clock**
supports the selection and setting of time across various time zones.
- Currency Conversion**
Supports conversion of 158 currencies, facilitating international trade for users.

- Unit Conversion**
- Supports various unit conversions, facilitating everyday use.

- Dictionary Translation**
- Unique Chinese learning features, the device is equipped with a Chinese classical poetry dictionary, an English-Chinese dictionary, a Chinese character dictionary and an idiom dictionary, etc. Through voice intelligent search technology, it achieves quick lookup with one click.

- TAPE**
- Integrated high-fidelity recording function, clearly records and saves audio information.

- Music**
- The device supports playing audio files from an external memory card.

- Video**
- The device supports playing video files from external memory cards.

- Settings Function**
- Some basic settings of the device can be operated on this interface: Including network configuration, Bluetooth connection, scheduled shutdown, application update, language, auto screen-off time, screen brightness, system update, about the device, etc.

- System Language**
- Chinese (Simplified)/Chinese (Traditional)/English/Japanese/French /Korean/German/Russian/Spanish/Vietnamese/Thai/Arabic/Indonesian/Dutch/Portuguese/Swedish/Turkish

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
