Precautions

- Before using this machine for the first time, please read the user manual carefully and follow all operating instructions and precautions.
- Because the high voltage inside the machine is dangerous, do not repair it by yourself. All repairs and adjustments must be performed by professionals.
- The power source used in this machine must match the type indicated on the nameplate.
- The power supply on the socket must not be overloaded, the power cord should be placed where it cannot be stepped on, and items should not be placed on the power cord.
- Do not place this machine on a sofa, near unventilated places such as curtains, or in direct sunlight and humidity, and avoid dropping or subjecting this machine to shock.
- Unplug the machine from the power outlet before cleaning. Do not use thinner or other chemical cleaners, just wipe with a soft cloth.
- After the machine is turned off, if you do not use the machine for a long time or in a thunderstorm, please unplug the power plug from the power.
- To avoid the risk of fire, electric shock, or product damage, do not expose the machine to rain, moisture, or dripping liquids, and do not place water-containing objects such as vases on the machine.
- Do not expose batteries or battery-installed devices to excessive heat, such as sunlight and fire.

FCC Statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
