Remote Instructions

Press power button to start vibration. Press repeatedly to cycle through 3 speeds and 7 patterns of simultaneous shaft and vaginal bulb vibration. Press and hold for 3 seconds to stop vibration.

*Dildo must be powered on separately.

Care Instructions

Use with water-based lubricant.

Wash after each use with warm water and toy cleaner. Pat dry and store in a cool, dry location, away from direct sunlight and separated from other toys.

Charging

*USB charging cable can be used for vibrator

Insert jackpin into DC dimple (located below control panel on vibrator & on back panel of remote) and connect to USB port or adapter. Power button will flash while charging. Remove from charger promptly once fully charged.

Product Information

Material: Silicone & ABS Plastic
Charging time: 2.5 Hours
Running time: 1 hour
Functions: 3 speeds with 7 patterns of vibration

Battery type: polymer battery 900mAh
Voltage: 3.7V
Remote distance: 15ft
Remote Voltage: DC12V
Waterproof: IPX7

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note 2: 1.Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

2. The minimum separation generally be used is at least 5mm.
