

Internal of sample

The image shows a blue printed circuit board (PCB) with a white RFID antenna pattern. The text "RFID-RC522" is printed on the board. A white connector is attached to the right side of the board. The entire assembly is highlighted by a red box.

A blue printed circuit board (PCB) is shown, oriented vertically. On the left side, there is a white multi-pin connector with several pins visible. The PCB has green conductive traces and several circular mounting holes. A small square component is visible in the center of the board.
