Inquiry on 01/30/2019 :

Inquiry:

Dear Sir:

We have a small bluetooth earbud, as the size is so small, we can't print the FCC ID on it, can we print in stick as attached picture, this stick is the only accessory of earbud that use for charging and storage, the customers can see the FCC ID once they open the stick, you can reference attached samples picture. At the same time, we will also describe the location of the FCC ID in user manual, pls kindly guide us. We need FCC approval our label location design.

BR.

FCC response on 01/30/2019

Yes, If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6 points), the FCC ID may be placed in the user manual. However, the charging box requires its own FCCID or SDoC approval.
