Intercom reset

Wireless Intercom Connection Operation Overview (Intercom is disabled by default at startup)

I: Wireless Reconnection. In wireless mode, devices that have been previously connected will automatically reconnect to the last paired mobile phone upon startup.

II: Intercom Reconnection. Devices that have been previously connected will enter intercom mode by short pressing the 'Intercom Button' after powering on, and the two devices will automatically reconnect to each other.

III: Clear Pairing and Restore Factory Settings. While powered on, simultaneously long hold down the volume down and volume up buttons for 5 seconds to clear all pairing information. The ambient light at the button flashes five times.

IV: Phone Priority. After powering on, the device connects to wireless. Regardless of the mode it is in, when the device receives or makes a call, it will automatically enter phone mode. After hanging up, it will return to the corresponding mode.

V: Display Screen. After powering on, the display screen will automatically turn off after one minute of no operation (power-saving mode). Any operation can wake it up.

VI: Does not support the 'one-to-two' function.

Instruction warning

NOTE: This product has been tested, meet the restrictions of Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the device.

This device complies with Part 15 of the FCC Rules. The operation needs to fulfill the following two conditions.

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

* RF warning for Portable device:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
