English (01-09)

Warm Tip:

Do not hurry to insert the transmitter into the car cigarette lighter the first time you use it. After starting your car, first tune your car radio to a blank FM station. It is normal to hear a slight rustle sound on a blank station. Then insert the transmitter into the cigarette lighter and adjust the frequency of the transmitter to the same one as the radio. When both of the frequencies are matched, the radio will become quiet and there will be no static interference. Finally you can connect your phone with the product by connecting the Bluetooth and play music or have a hands-free calling from the phone using the audio system in your car.

— 01 —

The built-in wireless V5.3 provides hands-free call function and music transmission, allowing you to transmit music and calls directly from your wireless device to your car audio system. This transmitter is also equipped with two fast charging ports (QC3.0+PD 20W), which will greatly save your time in charging phones. Please read the user manual carefully before use. Hope this device will make your driving more fun and safer.

How to use: FM Transmitter Radio

1. Tune your car radio to a clean, empty station with no programming.

Tips:

What is a blank station?
- A blank station with no programming will only make a slight rustle or snow sound on your car radio. If there is no blank station, please check if you have set the car radio to manual search model, as the radio will skip the blank station automatically if it is under auto search mode.

2. Plug the FM transmitter into the cigarette lighter or power port. The transmitter will automatically power on with the screen displaying the car's battery voltage first for a few seconds followed by the letters "bt", standing for Bluetooth.

— 04 —

3. Press the "CH" button on the transmitter to adjust the frequency and tune it to the same one as the radio. When the display shows the frequency number and keeps flickering, adjust the frequency by pressing "◀" or "▶".

4. Turn on the Bluetooth function on your phone and select "BS022" to connect. If a password is required, please enter "0000" or "1234". The display will stopped flashing once it is connected successfully.

5. You can then play music or have a hands-free calling from the phone using the audio system in your car.

— 05 —

Hands-free Calling Function

4. Turn on the Bluetooth function on your phone and select "BS022" to connect. If a password is required, please enter "0000" or "1234". The display will stopped flashing once it is connected successfully.

5. You can then play music or have a hands-free calling from the phone using the audio system in your car.

— 05 —

4. Turn on the Bluetooth function on your phone and select "BS022" to connect. If a password is required, please enter "0000" or "1234". The display will stopped flashing once it is connected successfully.

5. You can then play music or have a hands-free calling from the phone using the audio system in your car.

— 05 —

4. Turn on the Bluetooth function on your phone and select "BS022" to connect. If a password is required, please enter "0000" or "1234". The display will stopped flashing once it is connected successfully.

5. You can then play music or have a hands-free calling from the phone using the audio system in your car.
