

尺寸:64*67.8mm

3 IN 1 MAGNETIC WIRELESS CHARGER USER MANUAL OJD-112A

CE FC RoHS  
Made in China

Product Introduction

Thank you for purchasing this product! This product is a 3-in-1 Magnetic Wireless Charger, which is compatible with iPhone 12 to 14 series with MagSafe. If you want to use the phone case, please use the MagSafe one so that the wireless charger can charge your phones better with magnet absorption. The top watch charging area is only compatible with Apple watch, and the bottom earphone charging area is compatible with any Qi-enabled earphone charging box. We aim to provide you with convenient and efficient, safe and free usage experience.

Product Appearance

Product Parameters

Product Name: 3 IN 1 MAGNETIC WIRELESS CHARGER
Model: OJD-112A
Input: 9V $\approx$ 3A
iWatch Charging Output: 3W (max)
Earphone Charging Output: 3W (max)
Phone Charging Output: 5W/7.5W/10W/15W
Product Size: 108*64*22mm
Transmission distance: $\leq$ 6MM
Conversion rate: $\geq$ 73%
Color: Black/White/Grey
Interface: Type-C
Operative Norm: Qi standard

Method Of Application

1. Plug in the Type-C cable and connect with the power supply (adapter).
2. Place the compatible phone, Qi-enabled earphone, Apple watch in the center of the charging area and start charging.

State	LED Indicator
Power on	Blue & green on for 2s and then off
Mobile phone charging	Blue light
Earphone Charging	Green light
Mobile phone detects metal objects or abnormal charging	Blue light flashing
Earphones detect metal objects or abnormal charging	Green light flashing

Accessory List

3 IN 1 MAGNETIC WIRELESS CHARGER*1
C-C Cable*1
User Manual*1
Adapter*1

Matters Needing Attention

1. Please use a qualified QC power adapter, otherwise it may cause unstable charging.
2. Do not put metal debris or magnetic card on the product, it may cause damage to the product or abnormal charging.
3. Please follow the instructions strictly when using the wireless charger, or it would be of your own responsibility for any damage caused.

Safety Instructions

1. Do not pull the power supply hard, to avoid the power cord break or fall off.
2. Do not disassemble the product or put it into fire or water to avoid short circuit and leakage.
3. Do not use the product in severe high temperature, humidity or corrosive environment, to avoid damage to the circuit and leakage phenomenon

FAQ

Q 1. The phone does not charge.

A: The phone is not aimed at the charging sensing area or the receiving coil is not installed correctly.

Q 2. Charging fever.

A: It is normal for the receiving coil or transmitter to generate heat during wireless charging.

Q 3. Mobile phone charging intermittently.

A: The charging current of the power adapter is insufficient or the voltage is unstable, please use a qualified adapter.

A: The charging position is too biased, the electromagnetic induction is not in place, and the charging position needs to be adjusted.

Q 4. Slow charging.

A: The wireless charging current allowed by the mobile phone itself or the external receiving coil is different, or the standby power consumption of the mobile phone is large when charging, it is recommended to reduce the standby program of the mobile phone.

Q 5. Other questions.

A: Please contact after-sales customer service directly.

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. Such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
