

We, [Frontier Smart Technologies Limited], the grantee of FCC ID: [YYX-FS2345 Date of Grant: 02/27/2025], hereby authorize [Ultimea Technology (Shenzhen) Limited] to reference our original test data and reports (including conducted power, PSD, occupied bandwidth, and conducted spurious emissions) for their new FCC ID application under FCC ID: [2A900-UC001S]. [Ultimea Technology (Shenzhen) Limited] intends to integrate our certified module (Model: [FS2345]) into their host speaker product (Product Name: [Soundbar], Model: [UC001]). We acknowledge and agree that [Ultimea Technology (Shenzhen) Limited] will reuse the conducted test data from our original filing and will perform the necessary radiated spurious emission (RSE), band edge testing, and power spot checks on the host product to address the antenna difference and evaluate full compliance.

We attest that the RF circuitry, chip, layout, and software/firmware power settings of the module integrated into the host product remain equivalent to our originally certified module.

This authorization is valid only for the specific host project mentioned above.

Sincerely,

By:  16 July 2026
