4-WAY BEAUTY DEVICE MANUAL

RF Lifting Care (Recommended to perform twice a week)

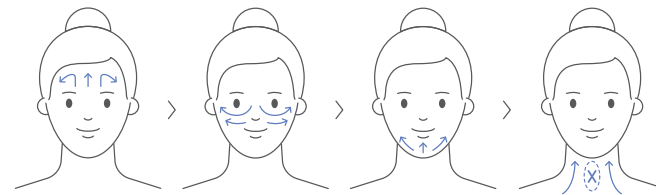

- Thermal energy of radio frequency reaches deep into the skin, which helps improve skin elasticity.
- Use of a metal material proven for medical use

[How to Use]

1. Thoroughly wash your face before using this device.
2. After connecting the RF LIFTING CARE head to the body, apply a massage gel or cream to the skin.
(※Be sure to apply a sufficient layer to the skin in order to experience the full effect of the product without irritation.)
3. Press the power button to turn it on.
4. Hold the device with one hand and gently massage the skin.
5. During operation, the device will vibrate at regular intervals at beep at 30 seconds intervals. The device will turn off automatically after 5 minutes of use.
6. After you finish massaging your face, please wash your face with warm water.

7. After using the device, remove the head and clean it with a soft dry cloth.
8. Press the power button briefly to change the mode.

[Massage Steps]

※ Avoid using it on the throat area where the thyroid is located.

Ionsono Booster

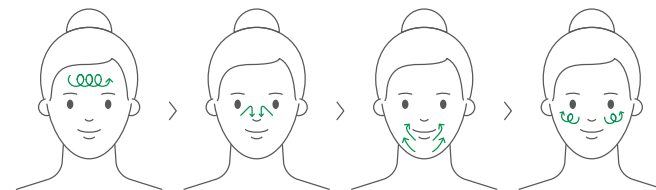

- GALVANIC : Galvanic current with negative ions helps active ingredients such as vitamin C found in your skincare product to be absorbed into your skin.
- ULTRASONIC WAVE : The ultrasonic micro-vibration infiltrates the dermis and helps the active ingredients penetrate deep into the skin.
- Use of a metal material proven for medical use.

[How to Use]

1. Thoroughly wash your face before using this device.
2. After connecting the IONSONO BOOSTER head to the body, apply a sufficient amount of your chosen skin care product for you skin type.
(※Please note that skincare products containing sunscreen ingredients or denatured alcohol may reduce the effect.)
3. Turn on the device.
4. **Make sure your hand touches the metal area on the back of the device and gently massage the skin.**
(※ Vibration is activated when your hand and the metal area on the back of the device come in contact, and if not, the effect may be reduced.)

5. During operation, the alarm every 30 seconds, and after 5 minutes, the device will turn off automatically.
6. After using the device, remove the head and clean it with a soft dry cloth.
7. Press the power button briefly to change the mode.

[Massage Steps]

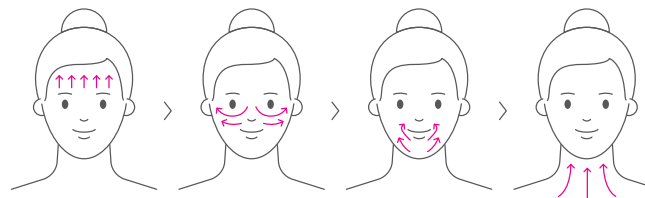

LED

- The red 650nm LED and IR 850nm LED penetrate the deep skin layers, helping to improve skin elasticity and brighten your complexion.

[How to Use]

1. Thoroughly wash your face before using this device.
2. Connect the LED head to the body and apply the skincare product for you skin type.
(※Please note that skincare products containing sunscreen ingredients, denatured alcohol or retinol may reduce the effect.)
3. Press the power button to turn it on.
(※Avoid staring directly into the LED light during operation.)
4. Do not hold the head when turning on the power. Device may not operate normally.
5. During operation, the alarm every 30 seconds, and after 5 minutes, the device will turn off automatically.
6. After using the device, remove the head and clean it with a soft dry cloth.
7. Press the power button briefly to change the mode.

[Massage Steps]

TIP : It is more comfortable to use if you pass the cable behind your ear.

Galvanic Mask Connector

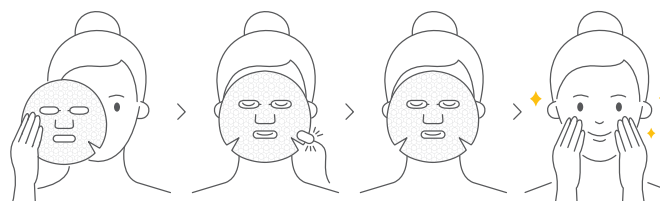

- GALVANIC : Galvanic current with negative ions helps active ingredients such as vitamin C found in your skincare product to be absorbed into your skin.
- Recommended for use with DIVE Vitamin Care Mask (Purchase separately)

[How to Use]

1. Thoroughly wash your face before using this device.
2. Connecting the GALVANIC MASK CONNETTOR head to the body and apply the Dive vitamin care mask (Can be purchased separately) evenly onto your face in order.
3. Use the tongs to connect the mask to the device, and then press the power button to turn it on.
4. Make sure your hand touches the metal area on the back of the device.
(※If your hand does not touch the metal area on the back of the device, the effect may be reduced.)
5. During operation, the alarm every 30 seconds, and after 5 minutes, the device will turn off automatically.
6. Remove the tongs from the mask sheet, and remove the mask from the face after 10-20 minutes.

7. Gently pat any remaining formula into skin.
8. After using the device, remove the head and clean it with a soft dry cloth.

[Massage Steps]

Skin Care Routine

I. RF LIFTING CARE (USE TWICE A WEEK)

Apply gel or cream on your face and use RF Lifting Care head to take care of your skin.

II. IONSONO BOOSTER (USE ONCE A DAY)

Apply a basic skincare product that suits your skin type, then use Ionsono Booster head for intensive moisturizing care.

III. LED (USE ONCE A DAY)

a. Rule Part 15.19(a)(3): This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

b. Rule Part 15.21: The users manual or instruction manual for an intentional or unintentional radiator shall caution the user that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help
