Camera handle style

Function introduction and usage

Button Prompt

When Bluetooth is not paired, the blue light flashes slowly. After successful pairing, the blue light turns off, and the phone displays that it is connected. If pairing is not successful within 5 minutes, the device will automatically shut down. When in use, the blue light flashes once for each key press. If no key is pressed for 15 minutes, it will automatically shut down. Upon reboot, it will automatically connect to the phone.

Connect Bluetooth

1. Press and hold the camera button for two seconds to turn on the device, and the indicator light will flash in a marathon pattern
2. Turn on your phone's Bluetooth and pair with the Bluetooth device (SHELL BOX-BT-PRO)

Precautions

1. When Bluetooth is not matched, the four indicator lights on the panel display in a marathon light pattern. When Bluetooth is connected, the four indicator lights flash three times quickly and then turn off. If pairing with a mobile phone is not successful within five minutes, the device will automatically shut down
2. Working indicator light: blue, battery indicator light: blue
3. After connecting to Bluetooth, press the button and the four working indicators will light up. Release the button and the working indicators will turn off
4. After pairing, if there is no operation within 15 minutes, it will automatically shut down
5. Battery low indicator light is flashing rapidly
6. The charging display method is as shown in the figure below. To check the battery level, double-click the power button, and the corresponding battery indicator will display for 6 seconds before turning off

Basic Information

Product Name: DB Waterproof Handheld Camera Handle

Product model: DB2501

Photographing/video recording method: Bluetooth connection

Application scenario: underwater photography and videography

Waterproof grade: IP68 / Max depth: 2 meters

Bluetooth function parameters

Bluetooth connection range: 18 meters in radius on land

Battery specification: 3.7V/110 mAh

Charging method: Type-C

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Warning Statement

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
