

Diagram showing the handle strap being attached to the bottom of the device.

The diagram shows two side-by-side representations of a smartphone. The left representation shows the back of the phone with a grid of circular camera lenses. A blue dashed rectangle is drawn around the top two lenses, labeled 'Camera window'. A blue arrow points from the text 'Suction cup' to the bottom-left corner of this dashed rectangle. The right representation shows the front of the phone with a solid black rectangle at the top, labeled 'Camera window'.

Diagram illustrating the location of the handle strap attachment point on the back of the device. A red line points to the attachment point, labeled "Handle strap".

Zoom

Zoom magnifies the entire screen:

- Double-tap three fingers to zoom
- Drag three fingers to move round the screen
- Double-tap three fingers and drag to change zoom

5. Note: The iOS system needs to be turned on "Settings" - "Accessibility" - "Turn on zoom" (Double-tap three fingers to restore to original size after turn on zoom)

1	Bluetooth camera controller	2	Screw
3	Non-slip handle	4	Lanyard hole
5	Bracket mounting hole	6	Camera window

- Power button

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
