

Confidentiality Letter

Date: January 26, 2023

Applicant: XCOM Labs

Federal Communications Commission

Authorization and Evaluation Division

Confidentiality Request for:

FCC ID: 2A9ZNXCOM5GRRU

Pursuant to FCC 47 CRF 0.457(d) and 0.459, Section 10, XCOM Labs requests that a part of the subject FCC application listed below be held permanently confidential and permanently withheld from public review due to materials that contain trade secrets and proprietary information not customarily released to the public.

- Tune up procedure
- Block Diagram
- Schematics
- BOM or Parts List
- Operational Description
- Internal Photograph of the Equipment
- User Manual

The internal circuitry and design are restricted to public access (end users). We are requesting the internal photos and user manual to be kept confidential by virtue of the fact that the end product is certified and housed in a sealed enclosure and the documentation is only accessible by trained/approved service maintenance personnel.

Having the subject information easily available to our competitors in this market would negate the advantage we have achieved by developing this product.

Further, the Applicant has spent substantial effort in developing this product, some aspects of which are deemed to be trade secret and proprietary. The design architecture of this product and operational usage are available to users only under an NDA between the organization of the user and XCOM Labs.

All sales of this product to the third party distributors and end customers will be under NDA and the final user of the device is subject to the NDA. A sample NDA has been included with this application.

Sincerely yours

Sheikh Hafiz

Title: Customer Engineering Lead
