

User Manual

Any change or modification not approved by the party responsible for the compliance could void the warranty.

This device complies with part 15 of the FCC Rules. Operation is subject to the following conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference that may be received.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device uses frequency modulation, which may cause interference to radio reception. This device may cause radio frequency energy and, if not installed and used in accordance with the instructions, may cause interference to radio reception. Interference to radio reception may be reduced by reorienting or relocating the receiving antenna. Interference may not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is advised to take the following steps:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

—Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This device has been tested and found to comply with the limits for portable operation in the uncontrolled environment. Refer to the Declaration of Compliance for more information.

The device has been evaluated to meet general RF exposure requirements in portable operation conditions.
