Inquiry on 02/08/2017 :

Inquiry:

Hi Dear,

I'm Joyce of SGS,I want to consult a label question.

There are two modules (PTR5528 and PTR5628) need to apply for the certificate.

The applicant said that the module was too small; they couldn't show the label in it.

If they can show the label in users manual, then explain why they do like this?

The sizes of the sample figure please refer to the attachments.

Thanks.

FCC response on 02/08/2017

If the device is unquestionably too small for the FCC ID to be readable (smaller than 4-6points), the FCC ID may be placed in the user manual. However, it must be determined that the device itself is too small – the label area allocated to the FCC ID may not be reduced because of overcrowded identification of other product and regulatory information.

The following information can be obtained from our website at:

<https://apps.fcc.gov/oetcf/kdb/forms/FTSSearchResultPage.cfm?switch=P&id=27980>. If the device meets the requirement then

itis allowed. Also, labelling guidelines can be found in Knowledge DataBase (KDB) Publication [#784748](#)
