FCC certification No. Cover Letter

We, Vuzix Corporation., hereby submit justification for placing the FCC certification No. in the associated user's manual and charging case.

According to the FCC regulation, the FCC certification No. should be printed on the M4000, but as the M4000 are too small to print the label (FCC ID: 2AA9D-490), It will be used an E-Label. The details are as below:

- A. Top (A): The top does not provide enough physical space to fit the printing of the ISEDC certification No. according to below reference picture.

Conclusion: Based on the above description of area A, we conclude that the device is unquestionably too small for enabling the FCC certification No. to be printed onto any surface. We therefore request to move the ISEDC certification No. is displayed on the screen through the software in the form of an E-label.

Sincerely,

Signature:

Shane Porzio
