Antenna and Professional Installation Declaration

To Whom It May Concern:

We, Vivint, Inc., declare that the requirements of FCC KDB 353028 D01 Antennas Part 15 Transmitters v01r01 have been met for 2AAAS-CP08 and are explained below.

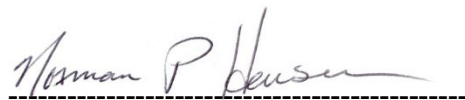

2AAS-CP08 has internal antennas only and they are not accessible to the user or installer. Disassembly of the product is required to access the antennas. The user and installer are not shown the antenna locations internally or how to access the internal parts of the device.

The 2AAAS-CP08 is not sold retail. It is only available from Vivint, Inc. Users connect with Vivint sales personnel who take the orders and set up the installation. The CP08 is then delivered and installed by Vivint professionals who have been trained to install the device and show the user how to operate the system.

The installer has no access to settings that would change power levels or change the parameters of transmitters within the device. All settings related to FCC compliance of this product are locked in non-volatile memory and are not accessible to the installer or the user.

This device must be installed by Vivint trained professionals in order to connect, set up the unit with the Vivint monitoring center, and test the alarm and other system functions.

Sincerely yours,

A handwritten signature in cursive script, reading "Norman P. Hansen", positioned above a horizontal dashed line.
