

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone, specifically the battery and the main board, placed next to a ruler for scale. The battery is a yellow rectangular unit with a label that includes safety warnings and technical specifications. The main board is a black rectangular unit with various electronic components. The ruler is marked in centimeters and millimeters.
EUT Housing and Board View 2	 A photograph showing the internal components of a mobile phone, including the battery, the main board, and the housing, placed next to a ruler for scale. The battery is a yellow rectangular unit with a label that includes safety warnings and technical specifications. The main board is a black rectangular unit with various electronic components. The housing is a black rectangular unit with a camera lens and a flash. The ruler is marked in centimeters and millimeters.

Solder Board-Component View 1	 A photograph of a small, irregularly shaped electronic component, likely a solder mask or a small PCB, placed on a blue textured surface. The component is dark with some lighter areas. It is positioned next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100). The component is approximately 1.5 cm long and 0.5 cm wide.
Solder Board-Component View 2	 A photograph of the same electronic component from a different angle, showing its underside. The component is dark with some lighter areas. It is positioned next to a black ruler with white markings. The ruler has two scales: one in centimeters (0 to 10) and one in millimeters (0 to 100). The component is approximately 1.5 cm long and 0.5 cm wide.

Solder Board-Component View 3	 A photograph of a small, irregularly shaped electronic circuit board (PCB) component. The board is dark green with various electronic components soldered onto it, including what appears to be a microcontroller, several resistors, and some surface-mount components. The board is positioned on a light blue textured surface. A black L-shaped ruler is placed next to the board for scale. The ruler has white markings in millimeters and centimeters. The board's length is approximately 40 mm and its width is approximately 20 mm.
Solder Board-Component View 4	 A photograph of the same electronic circuit board component from a different perspective (View 4). This view shows the underside of the board, revealing the solder pads and the components from the opposite side. The board is again placed on a light blue textured surface with a black L-shaped ruler for scale. The board's dimensions are consistent with View 3, approximately 40 mm by 20 mm.

Solder Board-Component View 9	 A photograph of a small electronic component, likely a solder board, placed on a blue textured surface. The component is dark green with various electronic components and a small circular component. A black ruler with white markings is positioned vertically and horizontally next to the component for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
Solder Board-Component View 10	 A photograph of the same electronic component from a different angle, showing the underside. The component is dark green with various electronic components and a small circular component. A black ruler with white markings is positioned vertically and horizontally next to the component for scale. The vertical ruler shows markings from 0 to 100 mm, and the horizontal ruler shows markings from 0 to 100 mm.
