

The image shows the back of a blue, handheld electronic device, likely a portable GPS or data logger. It has a flip cover that is currently closed. A small, black, flexible antenna protrudes from the top center. The device is made of a textured plastic material. On the left side, there is a label with regulatory information, including the CE mark, FCC ID (A50000), and the manufacturer's name, Jost Papp, LLC. On the right side, there is another label with technical specifications, including the model number (JST-100), the frequency range (433-434 MHz), and the power output (100mW). The device is resting on a light-colored wooden surface.
