

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing the conducted emission test setup. A black electronic device is placed on a wooden table. To its left, a silver power supply unit is connected to the device via cables. In the background, a wooden bench holds a piece of test equipment, and a wall with electrical outlets is visible.
Radiation Emission View (Below 30MHz)	 A photograph showing the radiation emission test setup. The black electronic device is placed on a wooden pallet on a metal floor. A metal frame structure is positioned in front of the device. The background consists of a wall covered with white and blue acoustic foam panels.
