Wireless Keyboard
FOR iOS/Windows/Android
BK3231

User Manual

Specifications
- Connection via: Bluetooth V3.0
- Dimensions: 295 x 125 x 8 mm
- Operating Range: Up to 10 meters
- Plugging Name: Bluetooth Keyboard
- Power Supply: 2 x AAA batteries (Not included)
- Key Life: 3 Million stokes

Getting Started
- Flash Blue (±3 min long) after pressing the “connect” button until a BT connection is conducted.
- When the unit is powered on, press the "connect" button, the keyboard is now ready to be connected to your device (e.g., computer, smartphone, tablet, game console, etc.).

Pair Display:
- The icon will flash blue (±3 min long) after pressing the "connect" button until a BT connection is conducted. After pairing, the Bluetooth signal disappears.

Low Power: The blue light will rapidly flash when the battery is weak and batteries need to be replaced.
- The keyboard will go off automatically after being idle for 15 minutes. To activate the keyboard, refer to the following procedures again.

Connection via: Bluetooth V3.0
- In case of connection failure, delete the pairing record from your device, and try the above pairing procedures again.
- After pairing for the first time, your device will connect to the keyboard automatically when switching on.

Operating Range Up to 10 meters

Power Saving Mode
The keyboard will enter into the sleep mode after being idle for 15 minutes. To activate the keyboard, press any key and wait 3 seconds.

Note:
- Only one device can be paired at the same time.
- After pairing for the first time, your device will connect to the keyboard automatically when switching on.
- If the device does not work, delete the pairing record from your device, and try the above pairing procedures again.
