

RCA AUX audio

Press the Power/Source button until White LED is lit. Connect your device to the RCA inputs with an RCA cable.

Optical audio

Press the Power/Source button until Orange LED is lit. Connect your device to the optical input with an optical cable. Your device's output settings may need to be set to PCM or Optical audio.

Replacing remote battery

Squeeze the battery door release and slide battery tray out of remote. Remove old battery and replace with new CR2025 or CR2032 lithium button cell battery.

Wall-mounting

Select a location for mounting the BlueSYNC® SBR, then mark two points 16 ³/₁₆ inches apart. Drill holes at those points large enough to fit the included plastic anchors tightly. Then screw in the mounting screws 90%, leaving enough room for the screw head to catch the mounting brackets.

Remote guide

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation. Compliance Information Statements: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: 1) reorient or relocate the receiving antenna; 2) increase the separation between the equipment and receiver; 3) connect the equipment into an outlet on a circuit different from that to which the receiver is connected; 4) consult the dealer or an experienced radio/TV technician for help. Modifications to this product not authorized by Accessory Power could void your right to use or operate this product by the FCC. Where shielded interface cables or accessories have been provided with the product or specified additional components or accessories elsewhere defined to be used with the installation of the product, they must be used in order to ensure compliance with FCC regulations.
