Change Contents: [Due to market demand, the customer will be adding a new antenna type. The addition of this antenna type will not affect the module's circuit diagram, PCB layout, components, component placement, or performance. The only difference lies in minor variations at the antenna connection point. As a result, the new antenna will undergo testing for radiation band edges, spurious emissions, and equivalent isotropic radiated power (E.I.R.P.), and only the worst case reported. For the other data, please refer to the original report.]

Sincerely,

A handwritten signature in blue ink that reads "jim hu". The signature is stylized with a cursive-like flow.
