

Difference Explanation

The company's applications for FCC certification of the smart projector models include: OVO-K2, OVO-K3;

The difference between these models is listed as below: the models are different because of the sales channels and customer code numbers; but their internal structure, circuit principle, and all key components related to electromagnetic compatibility are exactly the same. The difference does not affect the safety and electromagnetic compatibility of the product.

In addition, each model has different appearance colors or available to a variety of appearance colors.
