Methods of use

Two ways to charge

The Reserve® Wireless Charging Power Bank can be used to charged devices in two ways:

- ① Charge device via Qi-enabled wireless coil

- ② Charge device via USB-A port

3

Instructions

To charge your Reserve® Wireless Charging Power Bank, connect USB port to compatible power supply (for optimal charging use 2A minimum charging supply).

Power indicator

Enables pass-through charging while connected to a power source. Power is sent to your smartphone first, and then the Reserve® Wireless Charging Power Bank recharges itself. When in charging mode, the power indicator shows the charging status in different signs:

0%-25%
LED1 BLINK

25%-50%
LED1 ON,
LED2 BLINK

50%-75%
LED1-LED2 ON,
LED3 BLINK

75%-99%
LED1-LED3 ON,
LED4 BLINK

100%
LED1-LED4 ON

4

Power indicator (cont.)

Press button quickly to see remaining power

Press power button for three seconds to activate wireless charging. A solid green light indicates standby or no device, a solid blue light indicates device charging wirelessly.

GREEN / BLUE

Product specifications

- **Power Bank**
Rated capacity: 5000mAh
Input: DC 5V / 2A
USB Output: DC 5V / 2A max
- **Wireless Charging**
Output: 10W
Transmission Distance: < 8mm (0.31")
Conversion Efficiency: ≥72%

Size

Wireless Charging Power Bank :
130mm x 71mm x 14.7mm (5.12" x 2.8" x 0.58")

5

Note

When Reserve® Wireless Charging Power Bank is not connected to a power source, priority is given to USB-A output port. USB-A output port and Qi wireless charging do not function simultaneously. When connected to a power source, USB-A output charging will be disabled.

FCC Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help
- This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
