15C Test Setup

Photo of Setup for Radiated Emission (Above 1 GHz)

Photo of Setup for Radiated Emission (Below 1 GHz)

The photograph shows a laboratory or workshop environment. On the left, a light-colored wooden workbench is visible. On top of it sits a white power strip with a black cable plugged into one of its outlets. Another black cable extends from the power strip towards the right side of the frame. In the background, a grey metal cabinet or wall panel features three electrical outlets. To the right, a yellow piece of equipment, possibly a large container or machine, is partially visible. On the floor next to the yellow equipment, there is a small electronic device resting on a red base. This device has a silver heat sink, a prominent blue knob, and several small orange LEDs that are illuminated. Various cables are scattered around the base of the equipment and along the wall.
