SCOPE

Tests have been performed on *Long Range Systems LLC* product *Table Genie* Model *TX-3B25A* to demonstrate compliance with:

FCC Part 15 Subpart C (15.247)

All testing have been performed in accordance with:

ANSI C63.4-2003

FCC KDB 558074 D01 v03r01

Every practical effort was made to perform an impartial test using appropriate test equipment of known calibration. All pertinent factors have been applied to reach the determination of compliance.

OBJECTIVE

The primary objective of the manufacturer is to demonstrate compliance with the regulations outlined in the previous section. This report is intended to support an original grant of equipment authorization application for *Table Genie* Model *TX-3B25A*.

STATEMENT OF COMPLIANCE

Table Genie Model *TX-3B25A* complied with the applicable requirements listed under the following FCC rules as a 2.4GHz DTS transmitter:

FCC Part 15 Subpart C (15.247)

No additional model variations or configurations were specified by the manufacturer.

Maintenance of compliance is the responsibility of the manufacturer. Any modification to the product should be assessed to ensure compliance has been maintained.

Mike Williams was present during all testing to represent the manufacturer.

DEVIATIONS FROM THE STANDARDS

During testing there were no deviations from the regulatory rules and test procedures listed above.

MODIFICATIONS

None

MEASUREMENT UNCERTAINTIES

The measurement of uncertainty is not included with the data in this test report.

TEST RESULTS SUMMARY

FCC Rule Part	Description	Measured Value / Comments	Limit / Requirement	Result
15.203	Antenna connector	SMD chip on PCB	Unique antenna connector or permanently attached antenna	Complies
15.207	AC Line conducted emissions	Powered by a single AA battery	As specified in 15.207(a)	N/A
15.215(c)	Frequency band of operation	2405MHz - 2480MHz	Within 2400MHz – 2483.5MHz	Complies
15.247(a)(2)	6dB Bandwidth	1586kHz	> 500kHz	Complies
15.247(b)(3)	Conducted Output Power	0.00009W EIRP = 0.00016W	Conducted < 1.0W EIRP < 4.0W	Complies
15.247(e)	Power Spectral Density	-13.55dBm	< 8dBm	Complies
15.247(d)	Antenna Port Conducted Spurious Emissions 30MHz – 25 GHz	-26.05dBc	< -20dBc	Complies
15.247(d) 15.209	Radiated Spurious Emissions 30MHz – 25 GHz	50.2dBuV/m at 3m	15.209(a) in restricted bands, all others < -20dBc	Complies

Notes:

- Antenna is an SMD chip on PCB with a declared typical peak gain of 2.5dBi. For tests at the RF output port, a sample fitted with a suitable connector was provided by the manufacturer for direct measurements.
- Unit has no provisions for a direct or indirect connection to the AC power lines in normal operation. During tests that required continuous transmission at full output power, an external power supply was connected to provide the necessary voltage for a consistent test mode. Battery power option was not practical as the battery voltage level was being depleted fairly quickly during continuous transmission.
- 15.247(i) RF exposure requirements are addressed in a separate exhibit.
- A separate test report has been issued to demonstrate compliance with FCC 15B unintentional emissions requirements.

EQUIPMENT UNDER TEST (EUT) DETAILS

Long Range Systems LLC product Table Genie Model TX-3B25A is an IEEE 802.15.4 standard based ZigBee transceiver with the following details,

ZigBee push for service transceiver. It is based on IEEE 802.15.4 standard and employs OQPSK modulation with 250kbps data rate. It operates within 2405MHz-2480MHz frequency range. It has

Two samples were supplied for testing. One for all radiated tests and another for antenna port conducted tests with a fitted suitable antenna connector for direct measurements.

Support equipment used during testing:

Company	Model	Description	Serial Number	FCC ID
Topward	6303D-10	DC Power Supply	737138	N/A

EUT OPERATION

During testing, EUT was transmitting continuously at its highest power level at full data rate. Three different channels (low, middle and top) could be selected for continuous transmission as needed.

TEST SITE

Final test measurements were taken at the test sites listed below.

Site	Registration Numbers		Location
	FCC	Canada	
Chamber 1	A2LA Accredited Designation Number US1077	IC 4319A	1701 E Plano Pkwy #150 Plano, TX 75074.

ANSI C63.4 recommends that ambient noise at the test site be at least 6 dB below the allowable limits. Ambient levels are below this requirement. The test site(s) contain separate areas for radiated and conducted emissions testing. Considerable engineering effort has been expended to ensure that the facilities conform to all pertinent requirements of ANSI C63.4.
