7. Sleeping Current: $\approx 5\mu\text{A}$
8. Keystroke Force: $55\pm 10\text{g}$
9. Key Life: 3 million keystrokes

Keyboard Instructions

Battery Installation

The X300 wireless keyboard uses two AA batteries (not included). Open the battery compartment cover, take out the Nano receiver. Install the batteries into the compartment, and make sure the polarity of the batteries is correct. The positive (+) and negative (-) ends of each battery must match the positive (+) and negative (-) markings in the battery housing.

Pairing Method

Make sure the distance between the keyboard and the PC is within 3M. Plug the Nano receiver into USB port of the PC and it would pair automatically. The red "Num" LED will flash then turn off. Now the pairing is successful. Note: If the pairing is unsuccessful, Press "Esc" + "K" to re-connect.

Functional Zone

Press "Num Lock" button, the numeric zone will change to functional zone. Number "2", "4", "6", "8" are for down, left, right, up direction. Number "1", "3", "7", "9" are for "End", "Page Down", "Home", "Page Up". Number "0" is for "Insert". Decimal point is for "Delete".

LED Indicator

Low Power Indicator: It will show red color and flash in every 3 seconds when the voltage is lower than 2.1V.

M011 WirelessMouse

Product Specifications:

1. Working Frequency: 2.4GHz
2. Operation Voltage: 3.0V
3. Battery Type: 2 AAA batteries
4. Current Dissipation: 10mA
5. Standby Current: $0.8\pm 0.2\text{mA}$
6. Sleeping Current: $40\sim 50\mu\text{A}$
7. DPI Resolution: 800/1200 (Default) /1600
8. Working Distance: 8-10M
9. Dimensions: 115 x 62 x 36mm
10. Weight: 64.4g.

Pairing Method

Normally, pairing would be automatically. If the pairing is unsuccessful, take out the nano receiver, then plug in USB port again, then press middle key(scroll wheel) and right button simultaneously, the mouse should pair again.

FCC STATEMENT :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
