FCC Class 2 permissive Change Request

Number: **CF311**
Version: **V01**
Date: 30-12-2011

To: Federal Communications Commission
7345 Oakland Mills Road
Columbia, MD 21046

Attention: Application Examiner / Review Engineer

Subject: Class 2 Permissive Change Request

Hereby, we:

(the applicant company)

Company Name NEOCORTEC A/S

Address: Nannasgade 28, 2. sal

Postal/Zip: 2200 City: Copenhagen N State/Province: -- Country: Denmark

seek application approval for a Class 2 permissive Change on a currently certified device identified by:

	Grantee Code (CG)	Product Code	The initial (original) grant for this device was issued on:
FCC ID:	2AB76	NC1000C1	01/16/2020

The device was modified in the following manner:

This application for certification re-names the existing certified model NC1000C1 to NC1000C-9, whereas the product description has been updated from "NEOCORTEC Wireless Module" to "Wireless Mesh Network Module". The hardware and software remain fully identical. This application for certification adds the renamed model NC1000C-9 to the existing application.

In addition we add a version of this module where the RF connector is replaced by a 50mΩ ceramic resistor feed-through, which is called model NC1000P-9. Except for this change, the hardware and software remain fully identical. NC1000P-9 was re-tested for its radiated spurious emissions and conducted output power in order to guarantee that the properties remain the same and in compliance. This application for certification also adds model NC1000P-9 to the existing application.

Remark: The RF exposure justification of the existing filing remains valid, since the measured power in the original certification was 10.81 dBm and this now is 10.6 dBm.

Conclusion: By means of this Class 2 permissive Change, the models NC1000C-9 and NC1000P-9 will be added to the existing certification.

(below, indicate all documents supplied for this Class 2 permissive Change application filing)

The Exhibits include: 731 Form, Class 2 permissive Change Request (this letter), Agent Authorization Letter, Confidentiality Letter (long term and short term), Schematics, Internal Photos, External Photos, Radio Test Report, Test Setup Photos.
