Caution

Do not attempt to pry the battery door or damage the internal components when the back housing is opened. Any unauthorized damage may void the warranty and cause device malfunction.

Package Contents

Device	x1	Quick start guide	x1
USB to DC cable	x1	Paper Roll	x1
Rechargeable battery	x1	Charging Cradle(optional)	x1

Quick Start Guide

Before use

1. Push and slide the battery door button to open the battery door of WisePOS™ E+ to insert the rechargeable battery into the battery compartment. SIM card, SAM cards and SD card* to card slots properly. Push the cover again for battery charging via USB-C cable before use.

2. Open the battery door

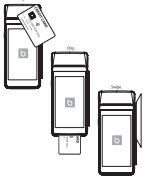
3. Install SIM card, SAM cards and SD card with your preference

4. Install the battery

5. Put the battery door back and lock it

6. Turn on the device and configure network setting. Once finished the setup, tap on the BBPOS APP and follow the APP instruction.

7. Start your business with BBPOS APP



FRONT PAGE

Change Paper Roll

1. Open the Printer cover

2. Replace the paper roll and close the Printer cover
- Make sure the paper roll size is 57 x Ø40mm
- Make sure the paper roll direction is correct

Charging Cradle (Optional)

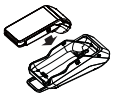
Charge with Cradle



Cautions & Important Notes

- Please fully charge your WisePOS™ E+ before use.
- Please use an rectangular-DMV chip of the card is facing the right direction when swiping or inserting card.
- Don't drop, disassemble, beat, open, crush, bend, deform, puncture, shred, microwave, burn, paint, or insert foreign object into the device. Doing any of which will void the Warranty.
- Don't immerse the device into water and place near heat source or any wet locations. Don't spill any food or liquid on the device. Don't attempt to dry the device with external heat sources, such as microwave or hair dryer.
- Please avoid using the device in extreme hot or cold temperature.
- Recommend using the device on flat surface only.
- Don't use any sharp tools to pry/ pint the internal components or connectors. Doing which may lead to malfunction and void the Warranty.
- Don't try to disassemble the device to repair. Please contact your dealer or BBPOS for repair service.
- Only suitable to use for output DC 5V, 2000mA, Vmax, CE-approved AC adaptor, other electrical testing of AC adaptor is prohibited.

Troubleshooting

Problems	Recommendations
Device cannot read your card successfully	• Please check if the device has power when inserting or swiping your card. • Please check if the application instructs to swipe or insert card. • Please ensure there is no obstacle in the card slots. • Please check if the magstripe or chip of the card is facing the right direction when swiping or inserting card. • Please swipe or insert card with a more constant speed.
Device cannot read your card successfully through NFC	• Please check if your card supports NFC payment. • Please ensure that if your card is placed within 4 cm range on top of the NFC marking. • Please keep your card still for a moment before and from and for a pause for payment to avoid any interferences.
Device has no response	• Please check if the rechargeable battery, SIM cards and SAM cards are properly inserted. • Please check if the device is fully charged. • Please restart the device to retry. • Please ensure you have successfully activated the APP. • Please hold the power button for 5 seconds to restart.
Device is Frozen	• Please close unused connectivity (e.g. Bluetooth, GPS, Hotspot etc) • Please avoid to run too many APP in background
Standby time is short	• Please check the Bluetooth function is turned on • Please make sure the distance between 2 devices is within 10 meter
Cannot find other Bluetooth device	• Please check the Bluetooth function is turned on • Please make sure the distance between 2 devices is within 10 meter

FCC Statement

FCC Statement: Any modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

SAR Standard

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless devices employing a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR value for the device as reported to the FCC when worn on the body, as described in this user guide, is xx W/kg. (Body-worn measurements differ among devices, depending upon available accessories and FCC requirements.) While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement. The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC exposure guidelines. SAR information on this device is on file

E. FCC ID: 2AFSD-WPSEPLUS

After being activated, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the device a minimum of 10 mm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the device a minimum of 10 mm from your body when the device is switched ON and transmitting. For more information about SAR, visit the FCC website at www.fcc.gov.

For handheld operating conditions, SAR tests with FCC limit is 1.6W/kg.

RF Exposure Information (FCC SAR) -
