**Re: Request for Confidential Treatment for FCC ID # 2ABDW-1229**

Dear FCC,

Chilton Fern LLC hereby requests that the materials listed below that are attached as exhibits to the equipment authorization application of FCC ID # 2ABDW-1229 be treated as CONFIDENTIAL. This request is made pursuant to 47 C.F.R. §0.457 and 47 C.F.R. §0.459.

Long-Term Confidentiality - We would like indefinite confidential treatment for the following confidential materials contained in our application because these materials contain sensitive technical and design information about our device that we would only share on a need-to-know basis, subject to confidentiality agreements, even after we begin marketing and selling the device. If this information is disclosed, our competitors would gain an unfair commercial advantage over us by knowing about our product design and development processes. This would then cause great harm in our ability to compete in a highly competitive market. The confidential materials that we are requesting indefinite confidential treatment of are:

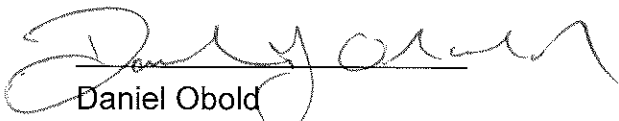

- ❖ Operational descriptions
- ❖ Schematics
- ❖ Block Diagram
- ❖ Software Security

Short-Term Confidentiality - We would like 180 days of confidential treatment starting from the grant date of the equipment authorization application for FCC ID # 2ABDW-1229 for the following confidential materials that were attached as exhibits to the application

because disclosure of this information before we market our device would be harmful to our business and impair our ability to successfully launch the device. These materials include information that is proprietary to our device and that is not publicly available, and we only share this information with third parties who are committed to maintaining the confidentiality of such information. The confidential materials that we are requesting 180 days of confidential treatment are:

- ❖ Test Setup Photos
- ❖ User Manual
- ❖ Internal Photos
- ❖ External Photos
- ❖ Photo of Antenna

Respectfully,

Daniel Obold
