Improper voltage may damage the product and cause potential safety hazards. - The light source contained in this luminaire shall only be replaced by the manufacturer or its service agent or a similar qualified person. - The light will produce heat during operation. Please keep proper ventilation. - Using objects other than the original one may cause product damage or safety hazards. - Do not use the lamp for glass or jewelry. - Do not put battery or battery products near the wireless charging area in case of any potential safety hazards. - For household use only. - Class II Luminaires. - All the pictures shown in this manual are for reference only.	This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into a wall outlet different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. To satisfy FCC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the exterior of the device and persons during normal operation. To ensure compliance, operations at closer than this distance is not recommended. Limited by local test regulations, version for North America does not have region selection option.	CE Declaration of Conformity Yeelight, Qingdao Yeelink Information Technology Co., Ltd., declares that the radio equipment complies with the EMC Directive 2014/53/EU. WEEE Disposal and Recycling information All products bearing this symbol are waste electrical and electronic equipment (WEEE) as defined in Directive 2002/96/EC and should be disposed of separately from other waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, approved by the government or local authorities. Please consult the retailer or local authorities for more information about the location as well as terms and conditions of such collection points.
