Yeelight LED Light Bulb (White)

User Manual

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To satisfy FCC RF Exposure requirements for this transmission devices, a separation distance of 20cm or more should be maintained between the antenna of this device and persons during operation. To ensure compliance, operation at closer than this distance is not recommended. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Type: YLDP01YL

Working Environment: -10~+40°C/0%~85%RH

Rated Input: 120V~60Hz/ 150mA

Color Temperature: 2700K

Communication Mode: Wi-Fi 2.4GHz

Rated Power: 8 watts

Size: 55*120 mm

Lamp Interface: E26

Service Life: approx. 25,000 hours

Luminous Flux: 600 lumens

01 Install the Light Bulb

Install the light bulb and switch on the power.

Notes:

- Make sure that the power is off when installing, removing or examining the light bulb.
- Do not use this product in a lamp with a light modulator to avoid damage to the product (such as a table lamp with a light modulator).
- Do not use the product in a wet environment.
- Using the light bulb in a narrow ill-ventilated tube lamp shade is not recommended because this may cause weak signals or heat dissipation issues.

02 Download the Mobile Client

Search "Mi Home" in Mi App Store or scan the QR code below to download the Mi Smart Home mobile client.

This product supports Mi Smart Home system and can be controlled by sliding on the locked MIUI screen and interact with other Mi Smart Home installed products.

You can buy more smart products on MI.COM or directly from Mi Smart Home mobile client.

03 Run the mobile client

Open the app and operate it in accordance with the instructions provided in the app.

* Make sure that your Wi-Fi connection is working.

How To Restore Factory Settings

Turn on and off the switch (not the mobile client app on/off button) continuously for 5 times. The light will be in the breathing mode. After 5 seconds, it will automatically restart with factory settings.

Safety Instructions

- Before use, please make sure that your voltage is appropriate to the product's working voltage. Using the product at a voltage other than the specified one may damage the product and create safety hazards.
- Do not disassemble the product.
- The light bulb will heat up during working. Do not use it in a confined holder for an extended length of time. Make sure that the light bulb works in a setting with cross-ventilation to facilitate heat dissipation.
