

Permissive Change Request Letter

Date: February 12, 2026

Federal Communications Commission

Authorization and Evaluation Division

7435 Oakland Mills Rd

Columbia MD 21046-1609

Subject: Description of Permissive Change

To whom it may concern,

Pursuant to 47 CFR §2.1043, Calix Inc., hereby submits this application for a Class II Permissive Change for FCC ID: 2ABLK-GS3137E, originally granted on 09/22/2025, with a subsequent approval on 11/21/2025 for the addition of DFS bands and 160 MHz / 240 MHz bandwidths.

The changes filed under this application are described as follows:

- 1.) To enable punctured transmission capability and Multiple Resource Unit (MRU) functionality in the 5 GHz (U-NII) and 6 GHz (U-NII-6ID and U-NII-6PP) bands through software implementation only.
- 2.) The software security mechanism remains unchanged from the original application.
- 3.) The DFS firmware and detection algorithm remain unchanged. Due to the enablement of additional operating modes, DFS compliance has been re-verified by the test laboratory, and an updated DFS test report is provided to confirm continued compliance.
- 4.) There are no changes to the hardware design or to any existing RF-relevant components.

Sincerely yours,

Applicant : Calix Inc.
Address : 1 Santana West, 3155 Olsen Drive, Suite 450, San Jose, California
95117, United States
