Application to Class II Permissive Change

This request is to add new module versions to the FCC ID 2ABQT-Q1025. The difference between the new module versions and the already certified version is described below.

Due to the strongly increasing utilization of the 5GHz band, it is now necessary to make the bands U-NII-2A and U-NII-2C available. In order to meet the requirements of the current DFS regulations, software filters have been adapted to ensure reliable detection of all radar pulses.

No other changes have been made to the hardware or software.

Thank you for your attention in this matter.

Yours Sincerely,

Imad Hjije
