

Distance Measurement

Pin Tracer™ Measurement

- With the power on, press and hold the Power/Measurement button() and scan around the pin (up to 3 seconds)
- When scanning the surroundings of the pin, it will recognize the closest object as a pin and give you a jolt (visual jolt ring & vibration)

- During measurement, the distance information will be displayed on the display screen.

Distance Measurement

What is Ball to Pin Measurement?

- Helps you select the right club with the luxury of measuring the distance from the ball to the pin effortlessly from your cart.

Main Screen

Quick Menu During
Golf Mode

- You can view the device's battery level directly on the display.

[Power Saving Mode]

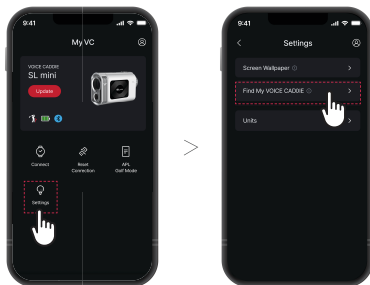

- When the battery is low, the device automatically enters Power Saving Mode and the display turns off. However, the laser measurement function continues to operate normally.

- The display becomes available again once the battery is sufficiently charged.

Find My Voice Caddie

ENG

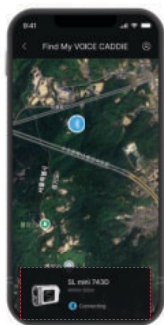

- You can check the time and location information of the device when it is disconnected from the app.
- The location data reflects the position where the device was last disconnected from the app, which may not correspond to its current location.

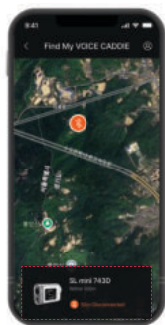

- APP > My VC > Settings > Find My Voice Caddie
- Please set the app's location permission to [Always Allow] to use this feature.

Find My Voice Caddie

- When connected to the app, the device's current location is displayed.
- If the connection is lost, the app shows the distance to the last known location of the device along with the time when the disconnection occurred.
