

Declaration

The differences between transmitters FT0313HD and FT0314HD:

As shown in the picture, there is only a difference in the red circled position on the front cover between the two models:

FT0313HD circled position is blank, no operation button. FT0314HD has a "COLOR TEMP" button in the circled position, which means that FT0313HD has one less button than FT0314HD.

The PCBA inside the two transmitters is completely the same with no difference.
