

Apply a duty cycle?

no

SAR type

Head/Body

This device FCC ID: **2ABWHAS1000A** is excluded from SAR testing by the following justification

The maximum power that the transmitter is capable of is **0.0300** mW* Using formula G.1 from ANSI C63.10: 2013

Using the following formula from section 4.3.1 (c)(2) of KDB 447498

$\{[(\text{Power limit for } <50\text{mm}) + (\text{separation distance} - 50\text{mm}) * (100/150)] * [1 + \log(100/f(\text{MHz}))]\}^{1/2}$

Max Peak Power (dBm)	Min Separation distance (mm)	Frequency (MHz)
-15.23	<50	0.058

Power Threshold
1004.060000

The maximum EUT power is less than the Power Threshold
