Modular Approval Request

FCC ID: 2ABWR-DKT003

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly		The module is not shielded and relies on the hosts tested within the filing for compliance (HMNs: SwingTracker, PitchTracker Baseball, PitchTracker Softball)
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	Data inputs are buffered through a microcontroller	
(c) The module must contain power supply regulation on the module	RF Voltage regulation is handled on the module.	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	The antenna is permanently attached to the module	
(e) The module must demonstrate compliance in a stand-alone configuration		The module is tested with specific hosts as outlined in the test reports provided within this filing.
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	Please refer to FCC ID Label format and location in attached file	

(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	The module complies with the rules governing the transmitter as laid out in the attached report.	
(h) The module must comply with RF exposure requirements	Below SAR exemption	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,
