CHANUN

This "Safety warning" is to keep you safe from accident and prevent you from property damage. Please read carefully and keep this manual where you can find anytime.

Warning
Possibility of
causing injury or
death if these
instructions were
ignored.

3. Do not disassemble or repair the product.

It may cause electric shock, product failure or malfunction.

4. If the product is wet, Do not try to dry it with heat. (Do not use heater, hair dryer, micro wave)

It may explode or cause malfunction. Please contact "SEMISOLUTION" customer service center. Do not use liquid or volatile substances.

5. Please only use components provided with the product.

If not it may cause malfunction or accident. "SEMISOLUTION" does not guarantee compatibility regarding any devices or accessories which are not provided by the company. "SEMISOLUTION" is not responsible for any product failure caused by the use of the components or accessory made by other than "SEMISOLUTION".

6. If you do not use for long time with constant power supply.

Do not operate the product if engine is not running. The engine start may fail if battery is discharged. Also when you are installing constant power supply please have it installed by expert, otherwise it may cause malfunction.

Safety warning (Continued)

CHANUN

This "Safety warning" is to keep you safe from accident and prevent you from property damage. Please read carefully and keep this manual where you can find anytime.

Warning

Possibility of
causing injury or
death if these
instructions were
ignored.

7. Do not use other than the rated voltage.

Do not separate the power cable during the operation. It may cause damage to the product.
Do not use other than the rated voltage(12~24V). It may cause damage to the product or fire.
Please comply with the instructions on this manual when installing the product.

8. Please keep black box separate from your car when you are not using it in the mid of summer and winter.

Do not leave the product under high or low temperature for long time. If the product is exposed to the sun light for long time in summer or left in cold in the winter it may cause malfunctioning of the product. Please keep the black box separately if you are not using it or parking your car for a long time.

Caution for your safety

CHANUN

This "Caution for your safety" and is to keep you safe from accident and prevent you from property damage. Please read carefully and keep this manual where you can find anytime.

Caution

If not complied with,
there's possibility of
minor damage,
service disturbance,
minor damage to the
product

1. Do not install black box where windshields is tinted or area where other foreign substance(sticker etc.) might interfere recording.

In a car with excessively tinted wind shield, the video image of the product may be recorded in dim or distorted quality. Install it in a place of clear view.

2. Keep camera lens clean.

If camera lens is dirty it may degrade quality of image recorded. Please keep it clean with dry and soft cloth.
Since the product is not water proof, do not use liquid.

3. If the product is destroyed by huge accident or power supply is disconnected, check to see if the product is working before use it.

If used without checking the product may not work properly and the video may not be recorded.

4. Check the product's location and the camera angle.

Please check the product's location and the camera angle frequently in a rough driving environment like bumpy road condition.

Caution for your safety (Continued)

CHANUN

This "Caution for your safety" and is to keep you safe from accident and prevent you from property damage. Please read carefully and keep this manual where you can find anytime.

Caution

If not complied with,
there's possibility of
minor damage,
service disturbance,
minor damage to the
product

5. Quality of recording may differ depending on condition of light.

Please be aware that the recorded video quality may degraded in extreme light conditions including the rapid surrounding light change such as in entering a tunnel, excessive strong backlight or the night without any light source.

6. If the impact of the accident was minor, it may not be recognized and may not be automatically saved as event record.

For an accident with the impact lower than certain degree, please be aware that the event data may not be recorded in the product. In this case you may mildly impact the product.

7. Please check the recorded video regularly.

Please check the recorded video regularly to be sure that SD card and the product is working properly. If any abnormal operation is found please contact "SEMISOLUTION" customer service center.

1. SD card is a consumable product. Please check it regularly, and if it is not working replace it.

When you are recording SD card is wearing out. therefore please check it regularly, and if it is not writing or reading you have to replace it.
But if you format it regularly you can extend its life cycle. (once in 2 weeks recommended. if you use it 24 hours a day, once a week)

2. Using SD card provided by ""SEMISOLUTION"" is recommended.

When replacing SD card we recommend you to buy from us. If not there can be trouble with compatibility with the product and recorded video can be damaged.

3. When taking out SD card from the product, please turn the product off first.

If SD card is took out while power is on, recordings in the card can be damaged and it can be the cause of malfunctioning of the product.

4. Do not disassemble or repair SD card.

SD card can be damaged and it can cause malfunctioning of the product.

5. When keeping SD card separately, keep it away from humidity, dust and heat.

If exposed to the humid, dust and heat SD card can be damaged.

6. For important data please back up the data else where.

If you want to keep the data for long time please save it in other device such as hard disk or CD.

What is GPS? The Global Positioning System (GPS) is a space-based satellite navigation system that provides location and time information in all weather, anywhere on or near the Earth, where there is an unobstructed line of sight to 3 or more GPS satellites. Using GPS technology the product saves location, speed and other circumstances of the moment you drive and your car's trajectory.

1. GPS is affected by whether, status of satellite, and surrounding geographical features.

A GPS receiver calculates its position by precisely timing the signals sent by GPS satellites high above the Earth. Each satellite continually transmits messages including the time the message was transmitted and satellite position at time of message transmission. Depending on the weather or other environment, it may take a long time to receive GPS signals right after the power is turned on. In case of the influence from buildings, underground, tunnels, street trees, the error range of receiving GPS is expanded. And in certain circumstances it may not be possible to receive GPS signal.

2. The product's function is not affected whether GPS is received or not.

Even if receipt of GPS is stopped, products' video recording function is working. But location, position indicator and speed of driving will not be recorded.

3. After purchasing the product, when you use it for the first time or did not use it for long period of time, GPS connection may take long time.

It may take from 5 to 30 minutes. It is time taken to verify location of satellite and receiving signals.

4. Optimal temperature for GPS operation is 0~50°C(32°F~122°F).

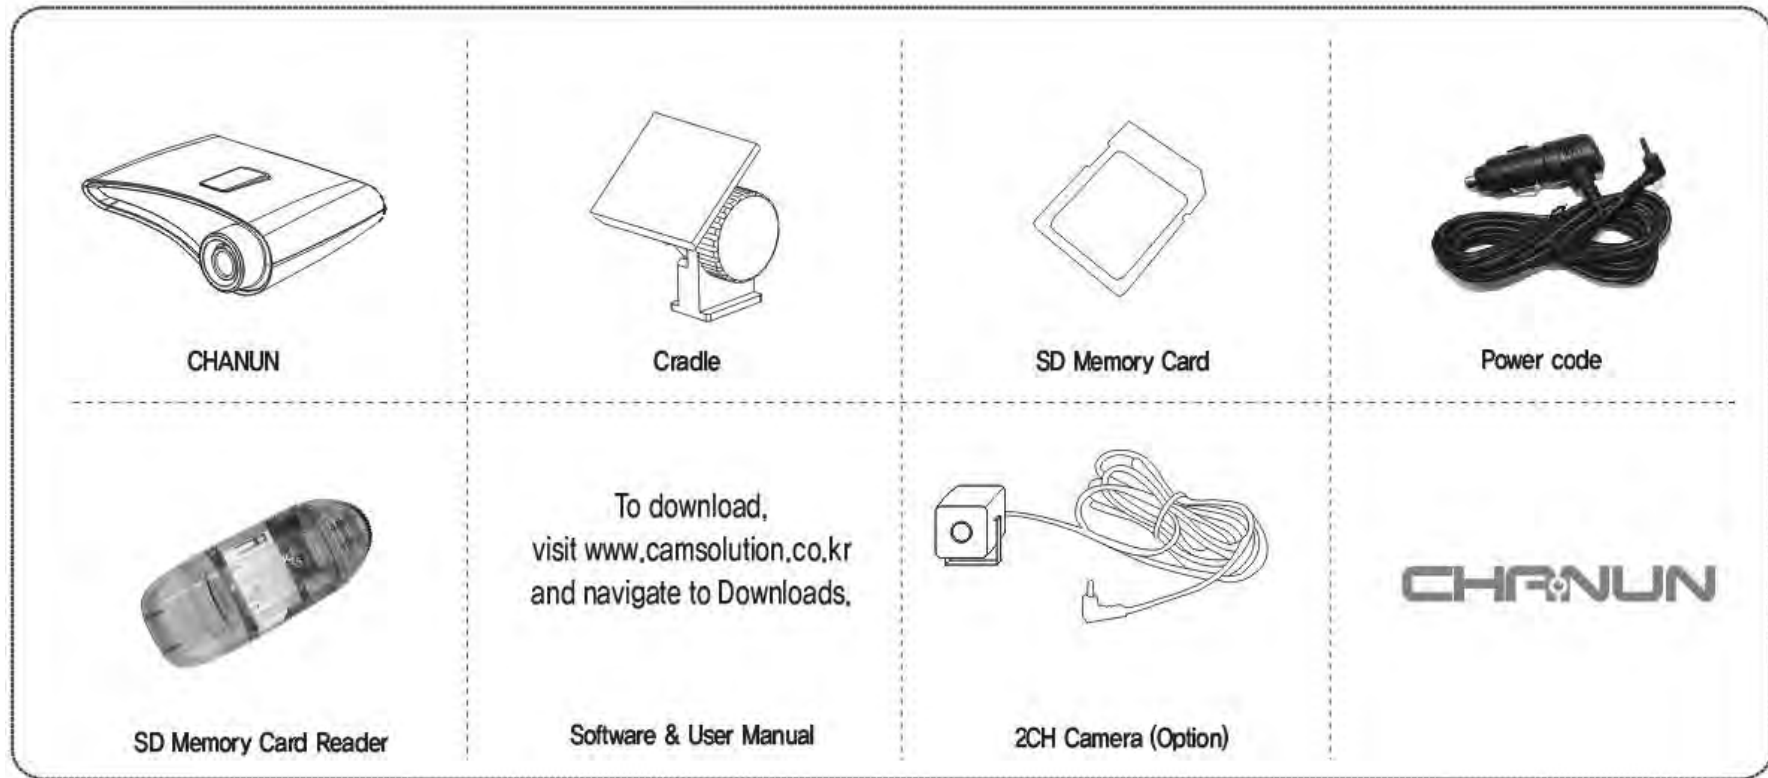

GPS receipt might take long time in the middle of summer or winter. Please keep the internal temperature at the optimal level.

5. If windshield is tinted or coated with metal components, GPS receipt can be disturbed and fail.

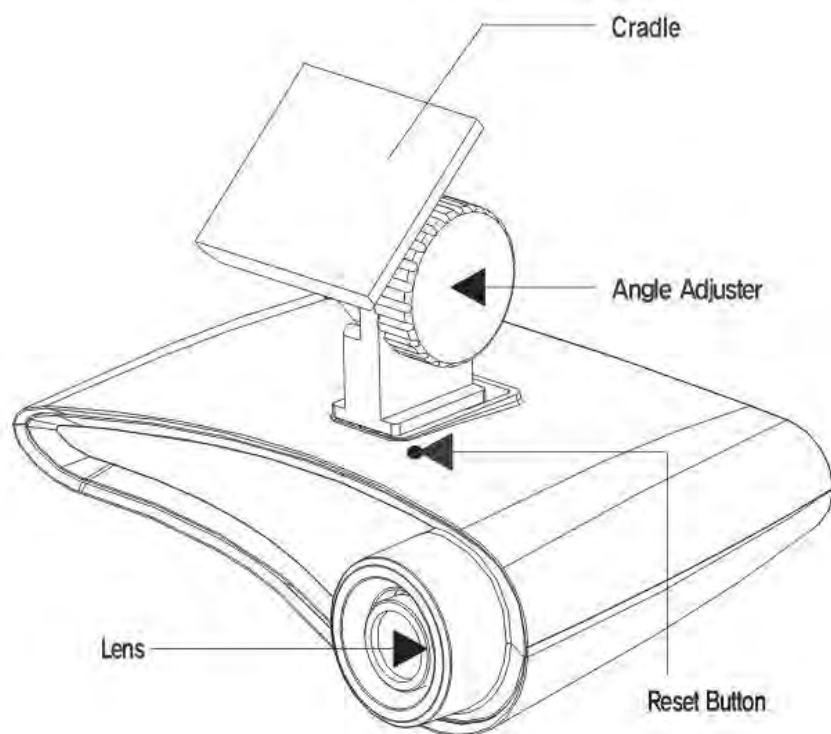

Please avoid installing the product around those area.

6. If there's any device that produces electromagnetic waves, GPS receipt can be disturbed and fail.

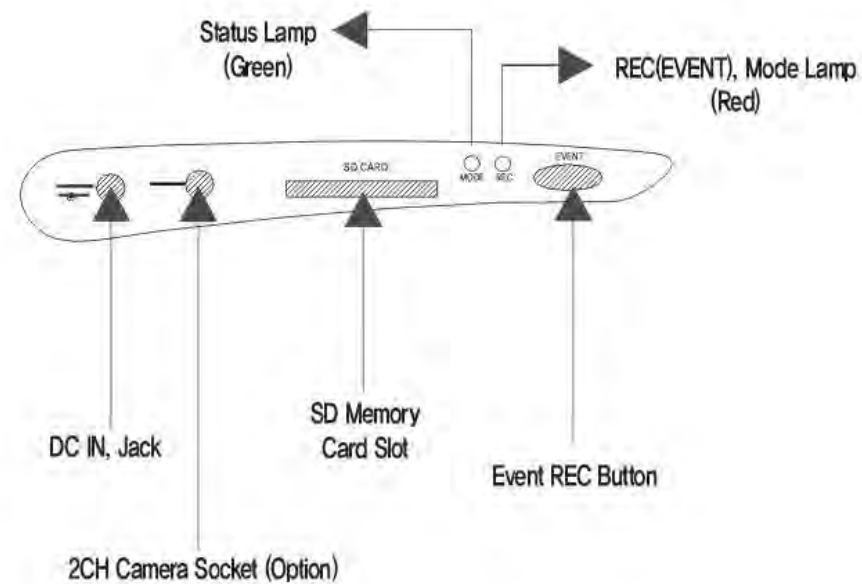

Some of wireless car start alarm, MP3 player, CD player, safety alarm using GPS or other kind of devices that receives GPS can cause electronic jamming signals and fail GPS receipt

※ This product composition can change without prior notice to improve the function of product. You can purchase each items in addition to the product composition.

Please Check before you ask for After sales service

CHANUN

Product is not working at all.

1. Check if the power adaptor is connected.
2. Make sure to use the cable provided with the product. If used with unidentified cable, it may damage the product.

Quality of recorded video is bad

1. Check if the lens is dirty.
2. The video from the camera will be affected by the environment (tinted windshield and etc.) of the installation site of the camera.
3. Quality of the video may differ depending on the environment of the time the video is recorded.

There is no video recorded on SD card.

- 1.. remove the SD card being used, and reinsert it.
- 2.. Check if SD card is LOCKED.
3. Format the SD card being used and try it again.
4. If you used SD card for too long replace it with new SD card.

There is time difference between actual time of the recording and the time marked on the recorded video.

- 1.. Please check the time setting from CHANUN PC exclusive player.

**GPS is not received
(GPS model only.)**

- 1.. Tinted or metal coated windshields in the car may influence GPS reception.
- 2.. If you did not use this product for long time or if it is first time to receive GPS it may take about 5~30 minutes.
3. Depending on the weather or other environment, it may take a long time receive GPS.

Where can I download CHANUN exclusive Player?

You can find CD-ROM in the package.
Also you can always download it from CAMSOLUTION homepage (www.camsolution.co.kr)

Can I play it from other general player?

This product saves recorded video in AVI file and it can be played in general video player.

What happens when SD card capacity is full?

Recording is possible even if SD card capacity is exceeded. The oldest recordings will be first to be removed and new video will be recorded.

Can I use any SD card?

Using authorized SD card is recommended. If not available, use SDHC product above Class10.

LED light from recorded video is blinking when I play it.

In the eye of the human LED light seems like it is on continuously but it keeps blinking thousands times a second. Therefore if recorded in certain frame, it may appear to be blinking.
