Solder Board-Component View 6	 A photograph of a green printed circuit board (PCB) component with silver solder traces and components. The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The ruler on the left is oriented vertically, and the ruler on the bottom is oriented horizontally.
Solder Board-Component View 7	 A photograph of a small, rectangular component with a blue top and a silver bottom, labeled "CB25". The component is placed on a blue textured surface. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters. The ruler on the left is oriented vertically, and the ruler on the bottom is oriented horizontally.

Solder Board-Component View 8	 A photograph of a small blue electronic component, labeled 'CB25' and 'CEM400P8 82 P2', mounted on a blue printed circuit board. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width spanning approximately 10 mm. The background is a light blue textured surface.
Solder Board-Component View 9	 A photograph of the same blue electronic component, labeled 'CB25' and 'CEM400P8 82 P2', mounted on a blue printed circuit board. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width spanning approximately 10 mm. The background is a light blue textured surface.

Antenna View	2.4 GHz WIFI Antennas  The image shows the antenna view of a CB2S module. The module is blue and rectangular, with a white label in the center. The label contains the following information: Model: CB2S, P/N: CB2S611211229, S/N: 10006131500E38. There is a QR code on the right side of the label. The module is placed on a blue, textured surface. A red line points from the label '2.4 GHz WIFI Antennas' to the top of the module. The bottom of the module shows several gold-colored pins.
