EMPOWER YOUR TEAM

A COMPREHENSIVE GUIDE TO SHOTTRACKER TEAM FOR
MAXIMIZING COMPETITIVE ADVANTAGE.

SHOTTRACKER TEAM IS COMPRISED OF COMPONENTS THAT WORK TOGETHER TO CAPTURE REAL-TIME STATS FOR YOUR TEAM.

BASKETBALL

As part of the system, you will receive ShotTracker enabled basketballs. These are the only balls that work with ShotTracker TEAM. They have a small sensor inside that collects data, but does not impact playability.

PLAYER TAGS

You will need to distribute the enclosed Player Tags to your players. Prior to doing so, label each tag with a player’s number using the stickers provided. The tag slides inside the Player Tag Holder for practices, which is worn on the player’s shoe. The tag slides inside a jersey patch for games, which is sewn onto the player's jersey.

CHARGING STATION

The Player Tag Charging Station has 20 charging ports. We recommend that you collect and store the Player Tags in the Charging Station while they are not in use.

COURT SENSORS

The Court Sensors were (or will be) professionally installed in your gym based on the unique configuration of your facility. They are not included in this box. They are white and about 8” long. You may be able to see them in the rafters.

SHOTTRACKER TEAM APP

This app is used only by coaches and can only be used on an iPad. It displays data captured by the system for all the players and the team as a whole.

1 CHARGE YOUR DEVICES

Charging Station

Plug the Charging Station into an electrical outlet using the provided USB-C charging cable and charger. You must use a wall outlet to properly charge the Player Tags. Plugging the USB-C cable into a computer **will not** give it enough power to charge the Player Tags.

Player Tag

Insert each Player Tag into a port in the Charging Station. The light on the sensor will turn red when charging and then turn off when fully charged.

Charging Station

We recommend using the Charging Station when first charging the Player Tags.

Charging takes about 2 hours and will give you approximately 20 hours of playing time.

2 DOWNLOAD THE SHOTTRACKER TEAM APP

You will receive an email with:

1. Directions to download the “ShotTracker Team” App on your iPad (must be iPad 2 or newer running iOS 9 or newer).
2. ShotTracker Team login credentials to get you started. If you do not receive this information, please contact us at support@shottracker.com.

Downloading the App

Use the link provided in your email to download the ShotTracker Team App.

Logging in

When logging into the ShotTracker Team App, enter your username and password to get started.

Assigning Player Tags

Once you complete the setup, the app will walk you through instructions for assigning the Player Tags to your players, setting up and running a practice, and viewing stats and analytics.

3 READY THE BASKETBALLS

ShotTracker Basketballs

The ShotTracker enabled basketballs come ready to use and are the only balls that work with this system.

Turning On The Basketball

The basketball automatically turns on when in motion. A simple way to turn on the ball is to dribble a few times.

Turning Off The Basketball

The basketball turns off automatically if it's not in motion for a period of time.

4 READY THE PLAYERS

1. TURN ON PLAYER TAG

To turn on the player tag, give it a good shake.

A single blink means the tag is searching for the network.

A glowing blink means the tag is connecting to the network and a double blink means it is ready to use.

2. INSERT PLAYER TAG INTO THE HOLDER

Open the Player Tag Holder.

Insert the Player Tag into the Holder with the DD Sports logo facing up and entering the Holder first.

3. ATTACH PLAYER TAG HOLDER TO 4 LACES

Starting at the toe of your shoe, slide the Player Tag up and under 4 laces. The Player Tag can be worn on either the right or left shoe.

Secure the Player Tag by tightly connecting the two latches in the front of the Player Tag Holder.

The Player Tag MUST be secured properly to ensure accurate results. Double check that the tag is properly attached to four laces.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION: Changes or modifications not expressly approved for compliance could void your authority to operate this equipment.

IC

ENGLISH
This devices complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:
