HOW TO CONNECT

Step 1: Press and hold the Pairing button of DECT 300U for 5s to enter pairing mode (LED blue light flashing);
Step 2: Slide upwards and hold the power-on button of a W3XX DECT headset for 2s to enter pairing mode (Pairing indicator light flashing).

HOW TO SET UP RINGTONE

When the headset is in idle mode (not engaged in a call), press the multi-function button on the headset, and then press the DECT 300U Pairing button (which needs to be pressed twice to turn on/off the ringtone).
Headset sound prompt: two short beeps indicate activation, one long beep indicates deactivation.

FCC Statement:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

v Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Specific Absorption Rate(SAR) information

SAR tests are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. Before a new product is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limit established by the FCC, tests for each device are performed in positions and locations as required by the FCC.

For body supported operation, this device has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product.
