Chapter 1 Connection

Open software in your PC, select USB in Mode, connect R3 through USB line, after driver has finished installation, click “Open” as Pic.1-1.

Pic 1-1

Chapter 2 Read EPC

Select ReadEPC on top of navigation bar.

2.1 Start Reading EPC

Click “Start” to read EPC, EPC, TID, Rssi and Count data will show up in blank area in Pic.2-1. Click “Stop” to stop EPC reading.

2.2 Filter

Filter function can be selected to filter tag that has been read, including start address(Ptr), length. EPC, TID, USER areas can be selected. Click “Save” to save current parameters, click “Reset” to reset module to default. As Pic.2-2.

Chapter 3 Read and Write Tag

3.1 Read Tag

RESERVED, EPC, TID and USER areas can be selected to read data in each area and start address(Ptr) and data length(Len) can be adjusted. Default access password is 00000000, click “Read” to read data as Pic.3-1.

3.2 Write Tags

There are four block areas for each tag (RESERVED, EPC, TID and USER), user could setup start address(Ptr) and data length(Len), input default access password 00000000 and hex value, then click “Write” to write data as Pic.3-1.

3.3 Filter

User could setup parameters in “Filter” to filter start address, data length and data of tags in EPC, TID and USER areas as Pic.3-2.

Pic.3-1

Pic.3-2

Chapter 4 Lock and Kill Tag

4.1 Lock Tag

Enter access password of tag, and select options that need to be locked such as “Open”, “Lock”, “Permanent Open” and “Permanent Lock”, then select areas, click “Confirm” to lock tag as Pic.4-1.

Pic.4-1

4.2 Kill Tag

Enter access password of tag and click “Kill” button to destroy tag as Pic.4-3.

Pic.4-3

4.3 Filter

User could setup parameters to filter start address, data length and data for tags which locked and killed. Select EPC, TID and USER areas and setup length to 0 then clean data to disable filter.

Chapter 5 Setup

Click “Configuration” on top of navigation bar to enter setup.

5.1 Region

User could select UHF frequency band of multiple countries, click “Set” to confirm to setup frequency band, select “Save” to save current settings in module as Pic.5-2.

Pic.5-1

5.2 Protocol

User could select 4 protocols, click “Set” to setup protocol and click “Get” to check current protocol of module as Pic.5-3.

Pic.5-2

5.3 RFLink

User could select 4 RF links, click “Set” to confirm setup RF link, click “Get” to check current RF link setup.

Pic.5-3

5.4 EPC+TID

Select “Enable” or “Disable” and click “Set” to enable or disable EPC+TID mode. Click “Get” to check current status as Pic.5-5.

Pic.5-4

5.5 Tag Focus

Select “Enable” or “Disable” and click “Set” to enable or disable TagFocus mode. Click “Get” to check current status as Pic.5-6.

Pic.5-5

5.6 Fast ID

Select “Enable” or “Disable” and click “Set” to enable or disable FastID mode. Click “Get” to check current status as Pic.5-7.

Pic.5-6

5.7 Buzzer

Select “Enable” or “Disable” and click “Set” to enable or disable buzzer. Click “Get” to check current status as Pic.5-8.

Pic.5-7

6. UHF Infor

Click “UHF Infor” on top of navigation bar to check hardware version and firmware version as Pic.6-1.

Pic.6-1

7. Temperature

Click “Temperature” on top of navigation bar to check current temperature value of module as Pic.7-1.

Pic.7-1

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
