Inside view

A detailed view of the internal components of a laptop. The green motherboard is the central focus, featuring a large square CPU, two rectangular RAM modules, and a small black storage drive. Various other electronic components, including capacitors and smaller chips, are visible on the board. A large blue battery is positioned at the top, connected to the motherboard by a wide orange ribbon cable. Another orange ribbon cable is connected to the left side of the board. The motherboard is labeled 'EM_T8511A_V3_0L D' at the bottom. The entire assembly is housed within a black plastic chassis, which is resting on a blue textured surface.
